

NORTHERN KENTUCKY RIGHT TO LIFE*The March for Life*
January 22, 2020

On this 47th anniversary of the infamous decision of the Supreme Court exercising its raw judicial power over the lives of the defenseless unborn, we join with a multitude of others in many cities across this nation, to carry the message of Life to President Donald Trump and to the 146th Congress. We join the over 100,000 people who will march in a circle of life around the capitol in Washington, DC, on January 24.

As much as we would like to be there, for many it is impossible to travel to Washington. Again, we March on Paper. We openly lend our names to urge the adoption of a mandatory Human Life Amendment to the Constitution of the United States of America.

WE HAVE TAKEN A STAND!**WE WILL NOT COMPROMISE!****AND WE WILL BE HEARD!**

**HAVE WE FORGOTTEN
WHAT AN ABORTION IS?**

A first-trimester abortion is usually performed by suction and is known as an aspiration (or suction) abortion. In her book, *Caught in the Crossfire: A Year on Abortion's Front Line*, author **Sue Hertz** describes this type of abortion: "...the cervix is dilated with metal rods and a medical instrument called a cannula attached to a tube is inserted into the womb. The tube is attached to the other end to a suction machine, and when the machine turns on, the preborn baby is pulled out in pieces."

"The dismembered body parts are sucked into a jar which sometimes has a cheesecloth sack to catch the fetal parts. The abortionist then scrapes the lining of the uterus to get out any pieces of the baby or placenta the doctor may have missed. This is the most common abortion procedure in the United States."

Hertz described what the doctor did after the procedures: "... [the doctor] removed from the glass jar the cheesecloth sack which caught the fetal parts, dumping the parts into a basin at the end of the table, between [the patient's] feet. 'Two legs, two arms, two fists, a skull, a backbone, a placenta. We've got it,' he announced.

"The doctor needs to carefully search through the parts to make sure that every part of the baby has been removed. An arm or leg left behind could cause a terrible infection. In very rare, but horrifying cases, women have actually passed an arm or leg of their aborted child that was left inside them days after the abortion."

**A Change of Heart**

Graduating from medical school in 1976, **Dr. Anthony Levatino**, an OB/GYN, not only supported the so-called right of a woman to abort her child, but also was willing to proudly devote part of his practice doing first- and second-trimester abortions.

Struggling with fertility, Levatino and his wife decided to adopt, but soon discovered how difficult it was to adopt a newborn.

"It was the first time that I had any doubts about what I was doing because I knew very well that part of the reason why it's difficult to find children to adopt is that doctors like me were killing them in abortions," stated Levatino, in an article published by *LiveActionNews*.

In 1978, Dr. Levatino and his wife were fortunate to adopt Heather, after which they soon discovered that his wife was pregnant, and they had a son 10 months later.

In June, 1984, the tragedy all parents dread occurred. Heather was hit by a car.

"She was a mess," he explained. "We did everything we possibly could. But she ultimately died, literally in our arms, on the way to the hospital that evening."

The first D&E procedure after the accident, he describes: "I started that abortion, and I took that Sopher clamp, and I literally ripped out an arm or a leg, and I just stared at it in the clamp. And I got sick. But you know something, when you start an abortion, you can't stop. If you don't get all the pieces - and you literally stack them up on the side of the table [...] your patient is going to come back infected, bleeding, or dead. So I soldiered on, and I finished that abortion."

Feeling a change of heart, the doctor continued:

For the first time in my life, after all those years, all those abortions, I really looked, I mean I really looked at that pile of goo on the side of the table that used to be somebody's son or daughter, and that's all I could see. I couldn't see what a great doctor I was being. I didn't see how I helped this woman in her crisis. I didn't see the 600 dollars cash I had just made in 15 minutes. All I could see was somebody's son or daughter. And after losing my daughter, this was looking very, very different to me.

He ceased performing abortions.
May God bless little Heather and her parents.

Nothing Compares

"Abortion is not medicine. Pregnancy is not a disease," teaches the former abortionist, **Haywood Robinson, M.D., Director of Medical Affairs and Education at 40 Days For Life.** "There is nothing in this world that compares to seeing a mother cradling her newborn moments after birth. The hours following the baby's arrival are equally precious...there's nothing better than an infant's birthday."
